

Job Description Frontend Angular

We are looking for a Frontend Developer (Angular Developer) responsible for the client side of our service. Your primary focus will be to implement a complete user interface in the form of a mobile and desktop web app, with a focus on performance. Your main duties will include creating modules and components and coupling them together into a functional app. The artistic design will be delivered to you, together with a few HTML templates, but we will ask for your help in regard to animations, CSS, and final HTML output. You will work in a team with the back-end developer, and communicate with the API using standard methods. A thorough understanding of all of the components of our platform and infrastructure is required.

Responsibilities

- Delivering a complete front end application
- Ensuring high performance on mobile and desktop
- Writing tested, idiomatic, and documented JavaScript, HTML and CSS
- Coordinating the workflow between the graphic designer, the HTML coder, and yourself
- Cooperating with the back-end developer in the process of building the RESTful API
- Communicating with external web services.

Skills and Qualifications

- Proficiency with JavaScript and HTML5
- Professional, precise communication skills
- Deep knowledge of Angular 2+ , practices and commonly used modules based on extensive work experience
- Creating self-contained, reusable, and testable modules and components
- Ensuring a clear dependency chain, in regard to the app logic as well as the file system
- Ability to provide SEO solutions for single page apps
- Extensive knowledge of CSS and JS methods for providing performance.
- Thorough understanding of the responsibilities of the platform, database, API, caching layer, proxies, and other web services used in the system
- Validating user actions on the client side and providing responsive feedback

- Writing non-blocking code, and resorting to advanced techniques such as multi-threading, when needed
- Creating custom, general use modules and components which extend the elements and modules of core Angular 2+
- Experience with all levels of operation available to the front-end, such as from creating XHRs in vanilla JS to using a framework.
- Experience with building the infrastructure for serving the front-end app and assets
- Architecting and automating the build process for production, using task runners or scripts
- Documenting the code inline using JSDoc or other conventions
- Good to have writing extensive unit tests using automated TDD tasks
- Creating e2e test suites for all components, and running them with Protractor (or a well reasoned alternative)
- Creating configuration, build, and test scripts for Continuous Integration environments.
- Min 3+ years of relevant work experience.
- The ability to think on your feet.
- Self-confidence, flexibility, and a result driven attitude.
- Passion, and a hunger for success.
- Positive attitude with a willingness to help team members and provide excellent customer service to clients
- Understanding of Agile methodologies.
- Min 3+ years of relevant work experience.
- The ability to think on your feet.
- Self-confidence, flexibility, and a result driven attitude.
- Passion, and a hunger for success.
- Positive attitude with a willingness to help team members and provide excellent customer service to clients

Education:

(UG - Any Graduate - Any Specialization, B.Tech/B.E. - Computers, BCA - Computers) AND (PG- Post Graduation Not Required, MCA - Computers)
 A Bachelor's degree (in Computer Science or equivalent) with a minimum 5 years of relevant work experience.

Job Type: Full-time
